

Hydraulic speed/feed controls from ACE are maintenance-free, self-contained sealed units for precise control of speed in both directions of travel. The travel speed can be adjusted independently in each direction of travel. Applications include pick and place, machine slides and guards, flaps and hoods etc. The wide variety of mounting accessories make the DVC easy to install on many different types of application.

**Positive Stop:** Provide mechanical stops 1 to 1.5 mm before end of each stroke direction.

**Operating fluid:** Automatic Transmission Fluid (ATF) viscosity 42 cSt. at 40 °C

**Material:** Body: Black anodised aluminium. Piston rod: Hard chrome plated steel. End fittings: Zinc plated steel.

**Note:** If unit has not moved for some time the seals may dry causing an increased break-away force on the initial cycle.

**Mounting:** In any position. End fittings must be positively secured to prevent unscrewing.

**Operating temperature range:** 0 °C to 65 °C

**On request:** Special oils and external finishes. Uni-directional damping (free flow in reverse direction).

### Damping Options

P = Damping in both directions (standard model)  
 M = Damping on out stroke only (adjustment knob at "rear end" free flow)  
 N = Damping on in stroke only (adjustment knob at "piston rod end" free flow)

The end fittings are interchangeable and must be positively secured by the customer to prevent unscrewing (i.e. Loctite). For mounting accessories see page 200.
